

You're Woke & can Handle the Truth?

7 SECRETS From an Ex-Illuminati / SSP Insider.
Free to the Masses.

1. You are immortal. Not that 3D avatar you are pushing around; the Real You. You simply have what scientists on the inside call "Reincarnative Amnesia". Dont worry, you can get your memory back. The real you, your Oversoul, is waaaaay freaking old, friend. So you can tell your mom, that in a way, you DID ask to be born.
2. Space Aliens came and enslaved humanity over 100,000 years ago. They love secrets (like their existence & that immortality thing we just covered) because KNOWLEDGE IS POWER.
3. These aliens created the illuminati, banking, and religion (among other things) as control systems.
4. Species-traitor humans sold out their own kind, and act as slave masters over the 99%. We'll call them the "Illuminati" or "the 1%" for now. The real masters don't need to work if they can get greedy, selfish, loveless humans to do it for them.
5. These slave masters act in secret, without accountability, and control at least 95% of the world's scientific information, historical information, money, and weaponry. They also hold dominion over the patent offices, corporate business, federal elections, the SES, secret space programs, advanced medicine, unlimited clean energy, the media, education, and

all established governments. ALL central banking is theirs to scam the 99%.

6. Population control. Population control. Population control. Too many slaves is a problem for them.

Think all modern wars, modified disease launches like HIV, dirty energy, aerosol injections (chemtrails), weather warfare, fluoride in water, big pharma including your shit flu vaccine, etc. Agenda 21 is the latest incarnation, targeting 90% of the human population for eradication.

7. There is a secret war for control of the planet Earth going on. Ex-Illuminati members, World Patriots, and other powerful secret societies are actively working to crush these I-holes... and we're winning.

Let me know if you have any questions or are ready for more red pills.

Sleep well. Dream big. Love wins.

Zenja...
