

I Can Day Dream, Can't I?

Dear Leaders & Members of the World Economic Forum (WEF), The Elite, your bloodlines and anyone else who believe that the depopulation of the, as you refer to them, useless eaters need to go.

We the people agree with you so we've compiled a specific list in the stead of utilizing your **willie nillie** methodology.

We're going to save some trees here by not printing each & every name, but you know who you are and what you've done. Don't be shy now....Stand up & receive the recognition you all so much deserve.

Here we go.....and the winners are.....10 second drum roll

All past & present leaders & members of the WEF, NATO, National Zionist Organization & subsidiaries, The WHO, CDC, FBI, MI6, CIA, Military Generals, All selected, not elected, world, country, state, and municipal leaders.

All CEO's and their families of corporate organizations, especially pharmaceutical companies which have harmed humanity in countless ways.

All with more than a billion dollars, or the equivalent of a billion dollars monetarily, invested, or holding likewise.

If we have missed anyone please stand now and be recognized as well.

Now our plan.

*You will have your choice of boarding a cruise ship line, we're naming it **The Good Ship Jolly Pop**. Kind of reminiscent of the flag you hold so dear....ha ha ha, or is it yo ho ho?*

You will set sail for the serene & beautiful deep blue waters of the south pacific thousands of miles from all land. What could be more peaceful than that?

Now for the exciting part of your one way journey. Did we mention it's one way? No bother.

We are now going to convert the entire cruise line into submersibles....YEA, this is going to be fun....don't you agree?

As your ship submerges into the depths you will all be greeted by some very hospitable sharks or is that hostile, again no bother. How exciting to be reunited with like minded entities.

Enjoy your journey!

Oh Yeah, We mentioned you have a choice.

The alternative is for you to change your ways & work with us instead of utilizing your current agendas.
