

Test your Knowledge!

You read a quality newspaper every day. You have a subscription on a critical monthly opinion magazine as well as a popular scientific one. You watch the news at least twice a day. You regularly visit news sites, libraries and bookstores. You are well educated, probably with an academic degree, so you have a solid background for knowledge. You know how to analyze and you are knowledgeable on many fronts. In a knowledge quiz you would stand a serious chance.

But could it be that somehow a small part of all there is to know has remained invisible to you? That some door has not been opened yet?

After all news and journals do not have the capacity to spend their energy on everything. So there must be more to know. Are you familiar with what kind of news that goes beyond the everyday actuality is presented on the internet? Are you curious what would be your score? Would you be able to get at least a C? Take the test with the next 100 questions:
