To fit their needs

The systematic implementation of the fall of the Republic and the rise of the corporation of the United States Every major event is a step in the ladder to achieve that end COVID is just another rung in the ladder which is why there's a deliberate mixing of all the wordplay We should stop calling it quarantine that's a term designated for people that are verified sick

This is a house arrest mandated by the State you should stop calling it social distancing there's nothing social about forced isolation

We should stop saying safer at home when Millions of Americans don't have basic necessities adequate to fit their needs it assumes that everybody's home is equally as safe as the people that are making the statements

We should stop saying this is for the greater good when you close the economy killing millions of businesses that families have worked generations to establish

That's anything but good We should stop saying this is the new normal that's just blatant mind control drivel there's nothing normal about forced isolation Treating your neighbor like they have the plague breathing your own bodily waste wearing masks living in constant fear of contamination That's normal I mean after all

If the virus is so deadly Why hasn't it wiped out the homeless who don't social distance or wash themselves regularly

Let alone live in the or have access to a sterile environment

Last year 1.5 million people died of tuberculosis why were you not wearing a mask during the tuberculosis pandemic You were endangering public health and safety along with billions of other people around the globe so Why didn't you wear a mask I'll tell you why because the MSM didn't tell you to wear a mask right And so because 1.5 million people died from tuberculosis there was no tuberculosis pandemic any more than there's a coronavirus pandemic what you're really participating in is A beta test for AI Systems and facial recognition see these cameras work best when people are a distance apart Now they're actually testing through machine learning how to recognize a face that's partially covered it's also a way to easily determine Who's compliant and who's not who does the propaganda work on and who it doesn't Now get this there's some ironies that are here a society that kills millions of babies a year for convenience Has shut itself down to prevent adults from dying people that on the one hand slaughter babies in the womb by the millions are now Preaching to the masses about the sanctity of human life that's Double-speak double-talk it's the two doctrine policy one for the initiated one for the uninitiated One for the inner circle another for the masses it's like saying if I violate the stay at home order I can be arrested but you're letting convicted criminals out of prison so they don't get coronavirus

THESIS ANTITHESIS SYNTHESIS

If there's a real pandemic does it require faulty virus models rigged test results 81% false positives Inaccurate news reporting staged hospital overruns Manipulated death certificates nope when the gov't shuts down Millions of small businesses but doesn't layoff any gov't employees It's not about the health when the State bans dentists from practicing But deems it necessary for abortion clinics to stay open it's not about your health when the State prevents you from buying seeds for your garden but Allows you to purchase lottery tickets it's not about your health an institution that has the ability to Destroy all of earth through alleged nuclear warfare should not regulate personal self-defense an institution that's Caught trafficking drugs shouldn't be able to regulate plants An institution that's racked up 23T prior to coronavirus in debt shouldn't be allowed to manage the retirement fund An institution that was caught spreading STDs should not be allowed to run healthcare If people are really concerned about public health and safety in general but they don't care if people Eat garbage drink poison smoke cancer and take prescription drugs but think that Toilet paper hand sanitizer and masks are going to protect them from the boogeyman coronavirus this is A special kind of stupid that I can't address here

You should ask yourself some ethical Basic questions

When did you consent from you created the government to serve you to you serving the government Ruling over you If you want to know who's in charge just think about who you can and can't criticize
