
Introduction

On August 9th 2019 I received a message from Kimberly Ann Goguen. She asked me to come up with ideas for how to deal with a situation in which the current global power structure that has been here for thousands of years is heavily crumbling and room seems to appear for contemplating on and acting towards new way of shaping our societies globally. She and her team have done all the essential groundwork for that room to appear and it is now really up to us to act on it.

Like many of you I do not have a ready made answer to her question. I do have expertise, but on only a small part of the solution. Others have other expertise in their specific field of interest. Together we may have many ideas of how to go forward. So it essentially comes down to getting together with as many different people as possible and collecting ideas for what comes next.

So what can we do? The issue as a whole is by far way to big to be dealt with by just a handful of people. However if it is broken down into pieces that refer to more specific fields of knowledge or interest it may seem less overwhelming. Some of these pieces you may not know enough about to come up with sensible ideas. Other may hopefully tickle and trigger you to propose your vision.

Below you see a list of questions you may ponder on. Alone or as a (THI) group. Each of you with your own experiences, expertise and talents. Some questions may remain unanswered simply because there is no one in your surroundings that can produce a wise vision on that particular subject. Other questions may be answered with a beautiful solution that can be discussed. And what works for one group or country might work just as well for other groups or countries. Let us create our own people's club think-tanks. Let us all pick up this challenge. If ideas and propositions can be shared with other groups or individuals something beautiful might emerge: a database with different solutions for each of the following questions. (Anyone specialized in databases?)

What would your ideal society look like?

1. how should we govern or be governed?
2. how do we organize ourselves?
3. how do we achieve true freedom for every human being on earth?
4. how can we secure sufficient health food and fresh drinking water for every human being on earth?
5. how can we secure sufficient energy for every human being on earth to thrive?
6. how can we secure safe and comfortable shelter for every human being on earth?
7. how can we secure physical and mental safety for every human being on earth?
8. how can we secure information and communication to be only accurate and truthful for every human being on earth?
9. how can we retrieve our true history?
10. should we have a money system and if so, how can it only be beneficial?
11. how can we assure what is produced by people benefits their society?
12. how can we permanently prevent armed conflicts and wars?
13. how can we prevent poverty and unbridled wealth?
14. how can we establish a fair justice system?
15. how can we prevent wasteful and toxic use of all the resources?
16. how should we teach our children to become respectful and responsible stewards of the earth and all its inhabitants?
17. how do we secure physical health for every human being on earth?
18. how do we secure mental health for every human being on earth?
19. how do we establish healthy and respectful relations with other beings?
20. how should we divide the wealth of all earthly assets among all human beings on earth?
21. how should people learn how to act responsibly with their money, assets, belongings?
22. how should entertainment serve us?
23. how should we make proper use of the specific talents of all human beings on earth?

24. should we prevent secrecy and if so, how do we prevent it?
25. how should we clean up and revive the earth?
26. how should we prevent all evil constructions, symbolism, acts and messages ever to occur again?
27. what should we do with all the bad actors?
28. how can we secure truthful open science for everyone to research?
29. how do we prevent malicious use of (new) inventions and technology?
30. how do we avoid any 'hooks' to lure people away from their true path?
31. how do we learn to use our original human abilities?
32. how do we evolve into spiritually mature and sovereign beings?
33. how should we behave towards each others?
34. how do we all learn to cooperate?
35. how do we achieve a harmonious society?
36. how do we achieve a human society that has the happiness of its members as its prime goal?
37. how do we transition smoothly from here to there?

The list is by no means complete. But we have to start somewhere. Feel free to add as many items as you deem necessary. Enjoy!

Btw, the message by Kim was not sent to me alone. Thomas Williams read her message in his August 8th THI show and addressed it per request of Kim to all of us.
